

YOGITA JAIN

AI & Data Engineer

yogitajain2510@gmail.com | +91 9165317750 | [LinkedIn](#) | [Portfolio](#) | Pune, India

PROFESSIONAL SUMMARY

AI & Data Engineer with 5 years of experience delivering scalable ETL pipelines, cloud data platforms, generative AI solutions and enterprise analytics using AWS, Databricks, Palantir, PySpark, and SQL. Demonstrated business impact through \$600K infrastructure savings, \$1M compliance cost reduction, and 45% user-efficiency gains. Production-grade expertise in LLM applications, RAG systems, and AI agents on AWS Bedrock. Seeking Senior Data / AI Engineer roles in enterprise tech, fintech, or AI-first product companies.

TECHNICAL SKILLS

Data Engineering	Python, SQL, PySpark, ETL/ELT Pipelines, Data Modeling, Data Warehousing, Data Lake, Data Integration, Batch & Streaming Pipelines, Delta Lake
Big Data & Platforms	Apache Spark, Databricks, Palantir Foundry
Cloud & Infrastructure	AWS (S3, Glue, Lambda, Redshift, Athena, Step Functions, EC2, RDS)
Generative AI & ML	Agentic AI, AWS Bedrock, Claude, LLMs, RAG Architecture, Prompt Engineering, LangChain, LangGraph, Embeddings, Vector Search
Data Governance & Quality	Data Governance, Data Quality Frameworks, Metadata Management, Risk & Compliance, Data Mesh principles
Tools & Visualization	DBT, Git, GitHub Actions, Jira, Power BI, Jupyter Notebooks, VS Code
Leadership & Delivery	Led cross-functional teams, sprint planning, stakeholder management, architecture reviews, and enterprise data migration initiatives.

PROFESSIONAL EXPERIENCE

AI & Data Engineer | John Deere

Jun 2025 - Present

Product Delivery Data & Analytics

Tech stack: PySpark, Python, SQL, Databricks, Palantir, AWS, Terraform, OpenAI API, AWS Bedrock, Claude, LLMs, RAG, Delta Lake

- Independently built a production-grade Generative AI agent using AWS Bedrock, Claude, OpenAI GPT, React, and RAG architecture - enabling semantic search and automated PLM query resolution, **reducing mean resolution time by 60%** and **improving user efficiency by 45%**.
- Architected and optimized scalable ETL pipelines using PySpark, SQL, Databricks, and Palantir for manufacturing and PLM analytics, processing **100 TB+ of enterprise data daily** with high reliability and sub-hour SLA compliance.
- Orchestrated Palantir pipeline optimizations using linter-driven recommendations and automated scheduling, delivering approximately **\$600K in annual infrastructure cost savings**.
- Designed a centralized API-based automation framework for enterprise data product registration across governance and quality dimensions, **eliminating ~200 hours/month of manual compliance effort**.
- Resolved critical AWS cloud vulnerabilities and owned enterprise-wide security and risk compliance across all production environments, achieving zero critical findings in quarterly audits.
- Executed a production EC2 infrastructure migration across AWS accounts using Terraform, enabling AWS account decommissioning and additional cloud-cost optimization.

Cloud Data Engineer | Deloitte USI

Sep 2021 - Jun 2025

Lincoln Financial - Product Strategy

Tech stack: PySpark, Python, SQL, AWS S3, Glue, Lambda, Amazon Redshift, Step Functions

- Designed and deployed batch and streaming data pipelines using AWS Glue, Lambda, and Step Functions for financial investment product analytics, **reducing data latency by 40%**.
- Automated sprint documentation and requirements workflows using Python scripts, **speeding up the project timeline by 25%** and freeing ~15 hours/week of business analyst effort.
- Spearheaded sprint planning and retrospectives for data migration modules, **ensuring 99.9% data quality** compliance across all pipelines.

NYL EDM - Cloud Migration

Tech stack: PySpark, Python, SQL, AWS S3, Glue, Lambda, EC2, Athena, Step Functions, Amazon Redshift, Docker

- Reduced \$1M in business compliance costs** by delivering the high-impact CCPA detokenization module within tight timelines, **processing 50M+ records** with zero data loss.

- Accelerated a complex cloud migration by coordinating **30+ interdependent work streams** across ~25 sprints, delivering 25+ optimization features, 120+ tables, and 10+ enhancements.
- Developed scalable, cost-effective ETL frameworks for migration of 250+ data sources; automated metadata configuration to **boost ingestion efficiency by 90%**, cutting onboarding time from days to hours.

NYL Service TZ Migration

Tech stack: Amazon Redshift, DBT, SQL, EC2

- Converted on-prem HQL to Amazon Redshift SQL, boosting data storage and processing performance by 30-40%, and **reducing monthly compute costs by ~\$80K**.
- Transformed 50+ tables across 10+ sources using DBT models; built ELT workflows and optimized SQL queries, stored procedures, and scripts, **cutting average query runtime by 35%**.

DirecTV - Data Strategy

Tech stack: SQL, Excel, MS Visio, MS Office

- Led Data Design work stream for 5+ high-priority business use cases supporting 10M+ subscriber records; designed Data Lineage diagrams and Source-to-Target mappings adopted as the team standard.
- Delivered end-to-end data documentation for 3 major reporting modules, **reducing onboarding time for new analysts by 60%**.

PROJECTS

Generative AI PLM Agent | AWS Bedrock, OpenAI, Claude, React, RAG

- Built a production-grade AI agent enabling semantic search and automated PLM query resolution, reducing resolution time by 60% and improving efficiency by 45%.

Enterprise ETL Platform | PySpark, Databricks, Palantir, Delta Lake

- Designed and optimized enterprise-scale data pipelines processing 100TB+ daily, delivering ~\$600K annual infrastructure savings.

CCPA Detokenization Module | AWS Glue, Lambda, Step Functions, PySpark

- Delivered a regulatory compliance solution processing 50M+ records with zero data loss, reducing compliance costs by ~\$1M.

CERTIFICATIONS

AWS Certified Generative AI Developer Professional <i>(May 2026)</i>	AWS Certified Developer Associate <i>(Jun 2024)</i>
AWS Certified Machine Learning Engineer Associate <i>(Aug 2025)</i>	AWS Certified AI Practitioner <i>(Jan 2025)</i>
AWS Certified Data Engineer Associate <i>(Dec 2024)</i>	AWS Certified Cloud Practitioner <i>(Jul 2022)</i>

EDUCATION

Bachelor of Technology - Computer Science | Banasthali Vidyapith

CGPA: 8.45 / 10 | Jul 2017 - Jun 2021

AWARDS & RECOGNITION

John Deere

- Commendable Contribution Individual Award *(May 2026)*
- WOW Performance Award *(Jan 2026)*

Deloitte

- Data Engineering Performance Award *(Mar 2025)*
- AWS Community Initiative Award *(Jan 2025)*
- CCPA Development Applause Award *(Jan 2024)*
- Data Pipeline Performance Award *(Jul 2023)*
- Data Ingestion Performance Award *(Dec 2022)*
- Data Modelling Performance Award *(Mar 2022)*
